Where A Micron Matters

SINCE 2005

ISO 9001:2015 CERTIFIED

Leading manufacturer and supplier of Precision-Engineered Auto Parts, All types of Shafts, Gear Box Components, and Industrial Machinery Parts.

Industrial Parts Collection

01 EV Shaft

Precision EV shaft for smooth rotation and long-lasting performance.

02 EV Shaft

High-strength shaft for efficient torque transfer in EV systems.

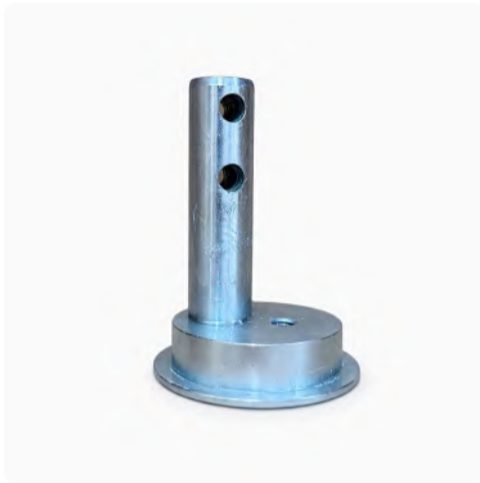

03 EV Shaft

Compact, durable EV shaft with low vibration operation.

04 Spline Shaft

Heavy-duty spline shaft for reliable high-torque gear engagement.

05 Eccentric Shaft

Precision eccentric shaft for smooth motion control and reliable performance.

06 Gear Box Shaft

High-strength gearbox shaft for efficient torque transmission and durability.

07 Special Output Shaft

Custom output shaft built to exact tolerances for specialized applications.

08 Output Shaft

Heavy-duty output shaft designed for stable power transfer and long service life.

09 Gear Shifter Shaft

Precision gear shifter shaft for smooth and accurate gear engagement.

10 Induction Motor Shaft

High-quality motor shaft for efficient power transfer and durability.

11 Induction Motor Shaft

Motor Shaft with Stepped Profile and Keyways for secure coupling and efficient torque transmission.

12 Output Shaft

Extended output shaft for long-reach power transfer.

13 Output Shaft

Robust shaft designed for secure and stable drive connection.

14 Motor Shaft

Stepped motor shaft engineered for precise rotational power transmission.

15 Output Shaft

Precision Output shaft for reliable torque transfer.

16 Output Shaft

Splined Output shaft for secure power transmission.

17 Hollow Shaft

Lightweight hollow shaft for smooth rotation.

18 Hollow Shaft

Heavy-duty hollow shaft for strong coupling.

19 Borewell Shaft

Threaded shaft built for strong fastening and dependable axial support.

20 Output Shaft

Precision-machined shaft for accurate fit and smooth rotation.

21 Output Shaft

Precision slotted output shaft for smooth and stable power transmission.

22 High Speed Shaft

High-speed compact spindle shaft for precision rotation in automated machining applications.

23 High Speed Shaft

High-speed precision spindle shaft developed for smooth, stable rotation in advanced machining applications.

24 Shaft

Threaded mounting shaft engineered for secure fastening and accurate alignment.

25 Output Shaft

Multi-step output shaft designed for secure coupling and balanced load transfer.

26 Hollow Shaft

Robust shaft-to-shaft coupling for structural joints.

27 Hollow Shaft

High-strength bearing for industrial applications.

28 Hollow Sleeve

High-strength sleeve for shaft support and alignment.

29 Gear Shifter Handle

Strong, precision handle for smooth and reliable gear shifting.

30 Auto Parts Pin

High-strength pin for secure fitting and long service life.

31 Mixer Machine Pin

Threaded pin designed for firm locking and load stability.

32 VMC Machine Block

Precision-machined mounting block with threaded ports for secure structural support.

33 Sun Pinion

High-strength sun pinion gear designed for smooth torque transfer in planetary systems.

34 Sun Pinion

Compact precision-cut pinion gear built for efficient gear engagement.

35 Ring

Durable machined ring engineered for secure support and stable component retention.

36 Ring

Heavy-duty mounting ring built for rigid support and durability.

37 Ring

Flexible isolation ring designed to reduce vibration and noise.

38 Ring

Precision damping ring for improved stability in rotating systems.

39 Precision Bush

Accurately machined bush for smooth shaft guidance and reduced wear.

40 Ring

Compact retaining ring designed for secure positioning and stability.

41 Mixer Bush

Seamless, low-friction connections.

42 Gear Box Planet Wheel

Engineered for High-torque mechanical systems.

43 Blank Gear

High-strength gear blank prepared for custom gear cutting and finishing operations.

44 Hex Nut

High-strength hex nut for secure fastening and reliable load holding.

45 Foundation Bolt

Heavy-duty foundation bolt for strong and secure machine anchoring.

46 VMC Machine Part

Precision-machined VMC component for accurate fit and durability.

47 Gearbox Flange

Robust gearbox flange for stable alignment and reliable power transfer.

48 Borewell Part

High-quality borewell part for dependable performance and long service life.

Uncompromising Quality & Innovation — We continuously invest in research and development to bring you cutting-edge solutions for your industrial needs. Our components are rigorously tested to guarantee superior performance and longevity.
